EXPERIENCE

2024 - 2026 — **Biomedical Illustrator & Animator**
Self-employed, Remote

I work with research teams, clinicians, and biotech/pharma clients to translate complex scientific and medical information into clear, accurate, and visually engaging content. My work includes developing medical illustrations, figures, animations, and videos that explain mechanisms of action, clinical concepts, and research findings for audiences ranging from specialists to patients.

2021 - 2024 — **Communication Specialist**
University Health Network, Toronto, Canada

I supported research communications through writing, videography, video editing, photography, and graphic design, ensuring that all materials were scientifically accurate, visually clear, and aligned with institutional and research objectives.
